Profile

Full Stack React-.NET Developer with hands-on experience in building scalable, secure, and maintainable web applications using **ASP.NET Core** and **React.js**. Skilled in designing RESTful APIs, implementing JWT-based authentication, managing application state, and working with relational databases. Experienced in applying clean architecture principles, writing maintainable code, and collaborating in Agile development environments.

Technical Skills

Backend Development:

C#, Web API, ASP.NET Core, RESTful APIs, ADO .Net, Entity Framework Core, Dapper, LINQ, JWT Authentication, Middleware, Dependency Injection, Clean Architecture, MS SQL Server

Frontend Development:

React.js, Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive UI, Axios, Component-Based Architecture, State Management

Cloud, DevOps & Tools:

Git, GitHub, GitHub Actions, Docker (Basics), Postman, Swagger, Vercel, Render, Visual Studio, VS Code

Software Engineering Practices:

Object-Oriented Programming (OOP), SOLID Principles, Clean Code, Layered Architecture, Agile Methodologies (Scrum), Sprint Planning, Daily Standups, Code Reviews

Experience

React-.NET Developer Intern — Bridgeon Solutions LLP

May 2025 – Present

- Designed and developed responsive, user-friendly front-end interfaces using React.js, Redux Toolkit, and Tailwind CSS, ensuring cross-device compatibility and improved user experience.
- Built and integrated RESTful APIs using ASP.NET Core, following clean architecture principles and REST standards for scalable backend services.
- Implemented secure authentication and authorization mechanisms using JWT, enabling role-based access control across application modules.
- Developed data access layers using Entity Framework Core and Dapper, explaining performance-conscious query design and efficient database interactions.
- Collaborated with team members in an Agile (Scrum) environment, participating in sprint planning, daily standups, code reviews, and iterative feature delivery.
- Used Git and GitHub for version control, branch management, and pull request workflows, ensuring clean and maintainable codebases.

Projects

Servexa – Full-Stack Salon & Spa Booking Platform

Nov 2025 – Jan 2026

- Developed a full-stack salon and spa booking platform using React.js for frontend functionality and Tailwind CSS for responsive UI design.
- Built backend services using ASP.NET Core Web API, handling booking workflows, user management, and service management.
- Implemented JWT-based authentication with role-based access control for Admin, Shop Owner, and Customer.

- Used Dapper for efficient and optimized data access in performance-critical backend modules.
- Applied Clean Architecture to structure backend code for scalability and maintainability.

ElectroKart – Full-Stack E-commerce Platform

Jul 2025 – Aug 2025

- Built a full-stack e-commerce application using React.js for frontend logic and Tailwind CSS for modern, responsive styling.
- Developed RESTful backend APIs using ASP.NET Core Web API to support product management, cart, orders, and authentication.
- Implemented database operations using Entity Framework Core ORM for managing products, users, and order data.
- Integrated frontend with backend APIs using Axios for asynchronous data communication.

Certificates

Full Stack Project Certificate

Technologies: Python (Flask), React.js, MySQL

Technical Workshop — Tata Elxsi

Automotive Embedded Systems and emerging technologies

Education

Peekay CICS Arts and Science College, Calicut University

Bachelor of Science (BSc) in Computer Science

Sep 2022 – Mar 2025
